Kyle Laster

React Developer

I am a front-end web developer with a focus in ReactJS. I developed a foundational understanding of HTML, CSS, and JavaScript through SMU's coding Bootcamp. Outside of Bootcamp, I have self-taught JavaScript, ReactJS, Redux, and CSS flexbox/grid. Due to my unique experiences as a stockbroker and educator, I am proficient in client relations and uncovering what the client truly wants in a final product. My goal is to join a team of motivated ReactJS developers with a passion for intellectual challenges, self-improvement and where advancement opportunities are within sight.
